

Is Nowsight™ right for you?

Do you have systems that require multiple logins and/or spreadsheets that are created manually that help run your business?

Does everyone have simple, real-time access and does information come automatically to them customized narrative for their specific role and position in the company?

Do you have people in roles (full or part-time) spending more than 2-5 hours each week on spreadsheets or reporting?

Most have up to 30% of their people working 2-5 hours/day on reporting - huge hidden cost - versus working on increasing revenue or decreasing cost

Do you have data that are 'trapped' in a server room, on someone's computer, or spreadsheets - and the information is distributed periodically as email attachments?

Less than 5% of people actually look at these, and don't look at the right information, and don't contain all or the correct info or timeframe to make good decisions - even if they are opened (which they are not).

Do people have specific personal or department goals that they need to deliver on daily/weekly to ensure the company hits their business objectives? Do they need to see their progress/performance?

If you checked two of more of these, Nowsight is indeed right for you. Contact us today: info@nowsight.com
